RESOLUTIONS

TARIFFS

New Delhi, the 28th July 1951

No. 8(4)-T.B./51.—The Tariff Board have submitted their Report on the Hydroquinone Industry. Though the indigenous product is cheaper than the imported product, the Board have taken cognizance of various adverse factors pointing to the need for protection and concluded that Hydroquinone being an essential chemical calls for the creation of favourable conditions for the continued expansion of this industry, which fulfils all the conditions prescribed for the grant of protection or State assistance. The Board have made the following recommendations:—

1. The existing revenue duties of 27.3 per cent., preferential, and 37.8 per cent., standard, should be converted into protective duties at the same rates.
2. In view of the present uncertainty regarding the future costs of production, the whole question

of protection to this industry should be reviewed within two years and the protective duties recommended should, therefore, be in force for two years.

3. The industry should make all possible efforts to expedite the production of aniline in order to make itself independent of imports in respect of this essential raw material.

4. Arrangements should be made with the Collectors of Customs and the D.G.C.I. & S. to record imports of hydroquinone by quantity and value.

2. Government accepts all the above recommendations and will take steps to implement them. The attention of the industry is invited to recommendation No. 3.

No. 12(3)-T.B./50.—The Tariff Board have submitted their Report on the Milk Powder Industry. Indigenous production is negligible in relation to demand and there is no early prospect of sufficient improvement in the supply position of milk in the scarcity areas where the industry is located which would enable the industry to dispense with protection or assistance. In view of these considerations there is no justification for increasing the burden on the consumer who will have to depend on imports, for a considerable length of time, for the bulk of his requirements of Milk Powder and Milk Food for Infants. Besides, the existing revenue duties of 25 per cent. and 31½ per cent. on condensed milk or powdered milk other than dried skimmed milk and milk food for infants respectively, are high enough. No case has therefore been made out for the grant of protection or assistance to the Milk Powder Industry. The Board have made the following recommendations:—

1. The industry should explore the possibility of shifting its location to areas where surplus milk is available and then approach Government for reconsideration of its claim to protection or assistance.

2. The expansion of the Dairy Industry, a national need of much greater urgency than the development of the Milk Powder Industry, should receive active support from the Central and State Governments and that all possible assistance should be given to those who wish to start dairies in procuring milch cattle, land and other facilities required for the purpose.

2. Government accepts the main finding, that no case has been made out for the grant of protection or assistance to the Milk Powder Industry. Government also accepts the above recommendations in principle, and steps will be taken to implement recommendation No. (2) as far as possible.
